BRIT CYPRUS BASES RECOMMENDED FOR DXCC

LAST MAY British DXers submitted papers to ARRL requesting DXCC status for their bases on Cyprus (5B4 call-signs); the application mentioned that the 1960 treaty provided for two British bases and as such seemed to meet all DXCC country criteria (See TDXB Issue 238 for details). The DX Advisory Committee agreed, as they just voted 15-1 to recommend DXCC status for the bases. The matter now goes to the ARRL Awards Committee, and it would not be surprising, considering recent events, if the Board of Directors got into the act, too. If Cyprus bases are granted DXCC status, QSLs from 5B4 stations since the treaty will probably all count. Next Honor Roll deadline will be Mar 31, and action on this matter will probably not take place before that time.

NO WORD on the possible Bouvet operation by ZS6BK (Issue 265), although there is still time for something to happen...and nothing firmed up regarding ZR6AOJ's assignment to Marion Island next year.

VIETNAMESE occupation forces reportedly began shelling areas of Cambodia near the Thai border, site of XU1SS, on Dec 11, but the station has been on the air at least once since then.

INDIAN elections began Dec 24 and continue all week; the final results will be announced Dec 31, with acting P.M. Rajiv Gandhi, VU2RG, anticipating being elected for a full term. It is hoped that eager Indian amateurs will be inspired to organize an Andamans operation soon, before HF conditions deteriorate further.

CHINA reports dribble in; Jim Smith's P29JS newsletter says BY5RA has been checking into his net on 14.220, Thursdays at 0700, but propagation has not been good. Word from Japan's DX Family Foundation is that a group of JAs will activate BY5RA early in 1985, but no specific dates are mentioned. Guest operators will include JA3UB and JR3MVF. BY5RA also still reportedly shows up in a DU9RG gathering on 14.145 or 14.180 at 1100Z.

One reader, currently snowbound in Colorado, reports that BY4AA was S9 for about thirty minutes, on 7081, 1430Z, Dec 15. Unfortunately, he goes on to say that DU9RG was "assisting," they tried to find a clear spot on which to listen for North America, but couldn't keep track of each other! Finally, P29JS mentions that BY4AA showed during his 0600Z gathering one evening the first week of December, with a "tremendous signal." The operator was John, a real old-timer who used to sign C1CH back in the late 40's. John supposedly enjoyed the net operation so much he promised to check into the net every Sunday at 0700Z. BY4AA, incidentally, has a 3 kW linear and beam...it seems certain they would be very easy to work anywhere in North and South America, if only they would get on the air at the right time.

MORE PETER 1 Island info, from Kan Mizoguchi, writing in Japan's CQ Ham Radio, is that he, JR1HHL, and JA1EFT (all honchos at the magazine) have made Peter 1 their big target. That island, you will recall, has been "pre-approved" for DXCC, and will count as soon as an operation takes place. Kan cites license, money, vehicle, and operator(s) as the biggest problems (they do have a license from Norway, for early 1985 and early 1986). They had hoped to have famous arctic explorer Naomi Uemura, JG1QFW, as operator, but he has since perished in an accident.

And now for the really bad news; JH1FDP, writing in Japan's DX Family newsletter, says February is the only month when the island can be reached by boat, and that the operators are likely to be on the air for only a few hours. Worse yet, the operators most likely to go have used list operations in the past (from China), and they are favoring the "list" technique for their Peter 1 operation. Finally, worst of all, is they are talking about taking the list with them, made up and ready to go. Get out your check-book.

HONG KONG's soon-to-commence transfer to control by the People's Republic of China will probably not affect amateur radio for years to come...eventually, it is expected that many of the current VS6 operators, virtually all British, may bail out of the country. China next sets her sights on Taiwan for a possible peaceful takeover. Speaking of Taiwan, former XW8BP surfaced there recently, after being "disappeared" for nearly ten years. Feng, who is Chinese, was an active operator on both phone and CW up until 1975 (his manager is still JH1ARJ). He passed the first ever Taiwanese amateur radio examination Oct 21, and expects to get a BV callsign shortly.

SEEMS LIKE ALMOST EVERYONE is picking on our material these days...Worldradio's DX column editor noted our opposition to rare DXCC country expeditions during contest weekends, and says "Let us not dictate to DXpeditions as to when they should plan their operations." We would have said exactly the same thing had Mt. Athos been on for the CQ Phone Contest and spent the entire opening to W6 working Western Europe.

TDXB scoop of the A61AA license situation has brought out the wolves...DX Report says (G3LCS) "as guest op, thr shud be no trouble. Query is if licence is for amateur or commercial operation." One reader poses the question "if (G3LCS as guest operator at A61AA) is indeed a serious concern, would anyone care to explain how K4YT's operation as 9Q5VT, with Vince Thompson's (K5VT) call, when he wasn't in the country, can, and does, count for DXCC? Our answer to that is...the United Arab Emirates isn't Zaire...each of these cases must be reviewed by the DXCC desk individually.

Finally, QRZ DX observes that "to be realistic about the situation, the proof of legitimacy is getting an A61AA card accepted by the DXCC desk...until that time anything else is immaterial." Well. Incidentally, our exclusive TDXB reporter says he has still not gotten a written reply to the letter he sent to the A61AA licensee.

FOR THOSE who think the DX world begins and ends at the DXCC desk, consider what has happened in Botswana...their "Botswana Amateur Radio Society" has written to ARRL and a few others, advising that "the Botswana Telecommunications Corporation, along with the Ministry of Public Works and Communications, REVOKED (the) Temporary Botswana Amateur Radio license (of) Mr. Jovanovic, ZS6BUX/A22 or ZS6DM/A22, as of 27 September 1984." A letter (entirely unedited) from the Telecommunications Corporation to Mr. Jovanovic reads:

"It has become apparent to the RSC section that you have drastically abused the privileges of temporary licence issue for Radio Amateur by practicing DX expedition within the borders of the Republic of Botswana. I would like to make one thing very clear to you, and that is the destruction you have caused to the Botswana Amateur Association and the Government of Botswana to the world is irreparable. My office cannot tolerate nor upbraid why you chose to brand our nation so badly moreover the hospitality of Selibe-Phikwe Radio Amateur Association that hosted you into their town. Please be aware that your temporary licence operation privileges are revoked as of the 27th September 1984 for ever." /s/ J.M.B. Sekete.

Well, they want ARRL to not grant DXCC credit for these operations (primarily ZS6BUX/A22), but we think that is wrong. The license, as originally issued, was perfectly valid; the fact that it was later revoked does not illegitimize contacts made before Sept 27. And, of course, QSLs have probably already gone out and been credited in Newington. Finally, we have the African Desk hard at work to find out just what Mr. Jovanovic's transgressions were.

MORE INSANITY...one night recently a "K8CRM/KH3" appeared on 3798; he worked CW. Said the reason was that his license class (General) would not permit him to work SSB on that frequency. We hope somebody is pulling our leg on that one. That was the same night that one "Rudi," signing KH4AH, appeared on 3798...Rick, KH6JEB/KH7 Kure, was there, too, and couldn't hear the KH4 station! And there's more...K1CTK is operating from the Ivory Coast, signing (so it is said) K1CTK/TUCL. That's right, K1CTK/TUCL. Finally, word comes that T12SK and T12FPE will operate from Cocos Island, Feb 11 to 15; they will sign T19TTY. Take another, close look at that callsign, will you? The boys will operate exclusively RTTY except, maybe, they will get on AMTOR. QSL to WB4UBD.

PACIFIC OPERATIONS last month by JE1JKL resulted in 300 contacts from 5W1EZ, followed by over 3000 as NH6J/NH8 in the CQ WW CW Contest. That American Samoa work was from the AH8A house; Saty worked ten countries and forty-nine contacts on 160 from there, and says that both AH8A and 5W1EJ now seem to have picked up an interest in Top Band. QSLs for both these operations go to JE1JKL or the bureau.

SPEAKING OF 160 METERS, we anxiously await February QST (or it could be the March issue), which will have November DXCC endorsements, including those 160 Meter endorsements which came in following the opening of the floodgates on November 1. While there is no "Honor Roll" on 160, the top listings will constitute a de-facto Honor Roll on our lowest frequency band; rumor is that one well-known DXer has upwards of 175 countries on 160. Other publications seem to have "work first, worry later" as their motto; ours is "Let's see the DXCC sticker."

FIVE YEARS AGO IN THE DX BULLETIN

(December 25, 1979): final announcement was made of the Kingman Reef/Palmyra operation, which would begin January 4, 1980. Operators were to include WA2FIJ, W5VAH, KB5FU, WD5FJL, WA6YQW, K2HXF, and K6LPL. The entire bunch would assemble on Palmyra, from which WA2FIJ, W5VAH, KB5FU, and WD5FJL would go to Kingman Reef. Be sure to watch this column in coming weeks, as this fascinating story unfolds once again.

Jim Smith, P29JS, operated from Nauru and Guadalcanal, and was working on a Christmas Island VK9X visit. The African operation by N2KK, K5CO, and N5AU, postponed in November, was still tentatively scheduled for early 1980. The DX Advisory Committee made its recommendations concerning Kiribati, and they turned down an application for country status for Argentina's Tierra del Fuego Islands. On Dec 22, 1979, our local 6-Meter buff worked Hawaii, for State #50; many hoped to hear the 6 Meter beacon from YBOX/9 starting Dec 29. K0BJ and N1DX finished their world cruise on the "Yankee Trader," during which they operated from over a dozen countries; the trip was Feb 15 to Dec 15, 1979.

PLEASE NOTE

We need more reports from the Midwest, West Coast, and elsewhere. We will stock you with report forms and envelopes...just ask.

Don't forget we are making up another list of DX-oriented repeaters and VHF watering holes; please send us the data on your local area. Thank you.
